## *Pomella®*, *MegaNatural®-BP* *Curcumin C3 Complex* and *Japanese Knotweed (Resveratrol)*

**BP Natural™** is a comprehensive nutritional formula containing potent plant extracts for nutritional support of normal blood pressure levels and cardiovascular health.\*

- **Pomella®** all-natural pomegranate extract, developed by Verdure Sciences, is standardized for its punicalagins content but also maintains the same ratio of polyphenols as whole pomegranate. Punicalagins are potent antioxidant polyphenols that are unique to pomegranates. The standardized extract (patent pending) ensures optimal consistency with no sugar, calories or additives.
- **MegaNatural®-BP**, a high polyphenolic grape seed extract developed by researchers at Polyphenolics, Inc., helps support blood pressure levels that are already within the normal range, normal endothelium cell function and normal arterial function.\*
- **Curcumin C3 Complex®** from Sabinsa Corporation is an extract of turmeric, patented for its unique composition ratio and use. The name refers to its three main chemical components: curcumin, demethoxycurcumin and bisde-methoxycurcumin, known collectively as curcuminoids.
- **Japanese knotweed** is a concentrated source of the antioxidant polyphenol, **resveratrol**. The extract used in **BP Natural™** is standardized to contain 20% resveratrol.

# NATTO NSK MEGA™

*A specialized metabolic enzyme called nattokinase (NK) from the Japanese food natto is emerging as one of the most exciting new breakthroughs for supporting healthy circulation.<sup>†(1,2)</sup> NATTO NSK MEGA™ uses Nattokinase NSK-SD™, a highly purified, patented ingredient.*

## Nutritional Support for Healthy Circulation

Backed by convincing and novel research nattokinase, a fibrinolytic enzyme, shows promise as nutritional support for healthy blood flow throughout the body.<sup>†</sup>

Blood is the transport vehicle that delivers nutrients and oxygen to every cell in the body, carries antibodies where needed, sends heat out to the skin and delivers waste products for excretion. Healthy blood circulation, therefore is essential for health of the entire body. Nattokinase is emerging as one of the most exciting new breakthroughs for supporting healthy circulation.<sup>†(1,2)</sup>

## NATTOKINASE NSK-SD™

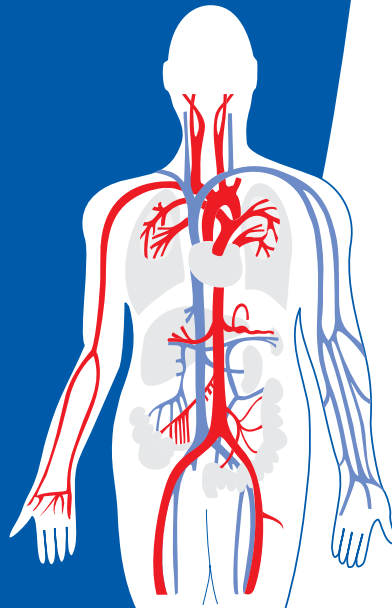

The Japanese food natto (from which nattokinase is extracted) is very rich in vitamin K<sub>2</sub> which, although it is an excellent form of vitamin K, is contraindicated with many medications prescribed to prevent blood clots. While many supplements may also contain some vitamin K, the nattokinase used in NATTO NSK MEGA™ (Nattokinase NSK-SD™) is produced under a very specific patented process that removes all the vitamin K, yielding only the purified enzyme.

## Enzyme Deficiencies

Enzymes are an important component of the diet -- like vitamins, minerals, fat, protein, carbohydrates, phyto-nutrients, etc. Without them, a deficiency state can occur that has been linked by various researchers to chronic disease, accelerated aging and premature death.<sup>(3)</sup>

During times of stress, sickness or reduced nutrient intake, the body can fall behind in its constant demand for enzymes.<sup>(3)</sup> Enzyme production also declines with age.<sup>(1,3)</sup>
