

# Noxylane4™ Quick Reference Card

**LANELABS** PLATINUM LINE

## Supports NK cell activity at a low intake

### What is Noxylane4?

Noxylane4 is the next generation in immune defense from LaneLabs. Noxylane4 takes arabinoxylane, the #1 NK cell immune compound, to a new level of immune support by enhancing it with HAI™.

**Arabinoxylane** integrates rice bran hemicellulose with Shiitake mushroom enzymes. Arabinoxylane has been clinically shown to support the immune system's Natural Killer (NK) cell activity. **HAI** (Heated Algal Ingredient) is a patented amino acid complex from Japanese seaweed which appears to improve bioavailability.

### How does Noxylane4 work?

The immune system is comprised of 130 different subtypes of white blood cells, each of which has a unique function. Many factors, including stress, heredity, aging, certain medications, insufficient rest, or unhealthy environment may affect the immune system's activity. Noxylane4 targets three of the most critical types of white blood cells, helping to support NK cell activity and T and B cell counts. NK cells are the body's first line of defense.

### Why is Noxylane4 superior?

Each Noxylane4 capsule contains 250 mg (or 500 mg in a Double Strength caplet) of arabinoxylane potentiated with HAI. Because of the HAI, Noxylane4 offers NK cell support at a low intake.

To test activity of Noxylane4, LaneLabs commissioned 2 separate pilot studies.

**Study 1** suggests beneficial NK cell support in 4 weeks in the low-usage Noxylane4 group (some participants saw no benefit).

**Study 2** involved healthy participants, given either Noxylane4 (at 1.5 g/day) or arabinoxylane alone (without HAI) at 3g/day. In just 4 weeks the Noxylane4 group demonstrated support of NK cell activity, Lymphocytes and CD56/CD16 values, similar to the group taking twice as much arabinoxylane daily.

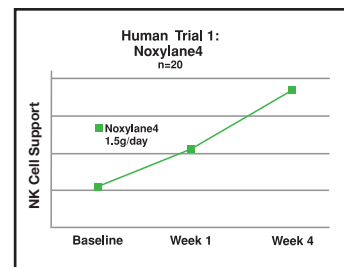

### How do I take Noxylane4?

**Daily Wellness:** Take 2 capsules daily, or one Double Strength caplet daily, with food.

#### For Maximum Benefit:

**Step 1:** Take 4 capsules or 2 Double Strength caplets twice daily for 3 weeks.

**Step 2:** After 3 weeks, reduce to 1-2 capsules twice daily or 1-2 Double Strength caplets daily.

PLATINUM LINE

## The Perfect Complement to Noxylane4™

### What is ImmunoFin?

ImmunoFin is a concentrated G-E lipid (Glycerol Ether lipid) supplement made from purified shark liver oil. ImmunoFin helps maintain healthy, white blood cells for the body's immune system.

### Why are the G-E lipids in ImmunoFin important?

Scientists believe G-E lipids are essential in helping human organs, glands and tissue generate new white blood cells. Yet, many adult diets are low in foods which provide G-E lipids. Mother's milk is one of the richest known sources of G-E lipids, followed by shark liver oil. Through a chemical-free extraction process, LaneLabs increases the concentration of G-E lipids in shark liver oil to 20% in making ImmunoFin.

### I take Noxylane4. Why should I consider ImmunoFin?

Noxylane4 has been shown to support the activity of existing Natural Killer (NK) cells. ImmunoFin helps maintain healthy white blood cells (the source of NK, T and B cells). The two supplements are synergistic.

### Are G-E lipids the same as other fish oils?

No. G-E lipids are different from Omega-3 fatty acids, found in most fish oils. Other marine lipids such as cod liver oil do not have the immune system building properties of G-E lipids.

### Does making ImmunoFin endanger sharks?

No. The shark liver oil used in ImmunoFin is a natural by-product of sharks harvested for food in Scandinavia, where shark has been a food staple for centuries. LaneLabs vigorously supports shark population conservation.

### How to take ImmunoFin.

When taking it alone or with Noxylane4, take one softgel twice daily with food.

## What satisfied users of ImmunoFin® say...

"I'm taking ImmunoFin and my doctor and I are very happy with the results!"

— N.F., Englewood, NJ

"ImmunoFin has helped me keep my immune system at peak performance."

— R.M.B., Aurora, CO
